Phillip G. Bradford

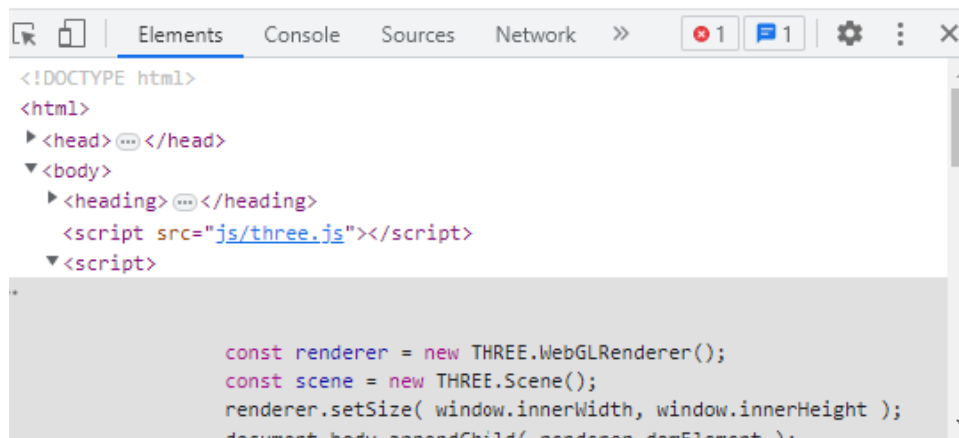

Beware

Browser caches

Clear cache to get expected behavior

Python's http.server - returns 304 – also sort of a cache

Look at the code the browser is using, Windows : <shift>-<CTL>-J

```
<!DOCTYPE html>
<html>
  <head>
  </head>
  <body>
    <heading>
    </heading>
    <script src="js/three.js"></script>
    <script>
      const renderer = new THREE.WebGLRenderer();
      const scene = new THREE.Scene();
      renderer.setSize( window.innerWidth, window.innerHeight );
      document.body.appendChild( renderer.domElement );
```
